Mohammad Mansib Newaz

Developer · AI & Automation · Workflow Interfaces

mohammad.newaz1@northsouth.edu | Dhaka, Bangladesh | LinkedIn

Professional Summary

Developer focused on practical AI, workflow interfaces, and understandable tools. Public work includes a YOLO11 Nano traffic-sign research prototype with Gradio inference and HTML/CSS/JavaScript business interface prototypes. See the case studies for implementation evidence and limitations.

Experience

Back End Developer

Jun 2022 – Jul 2023

Self-employed

- Developed robust backend systems for various applications
- Implemented secure API development practices
- Focused on automation and efficiency improvements

Education

Computer Science studies

North South University

A Levels & O Levels

Mastermind School · 2016 – 2019

Middle School Diploma

Rama Global School · 2012 – 2015

Technical Skills

LANGUAGES

Python | JavaScript | C/C++ | SQL

AI / ML

TensorFlow | PyTorch | Scikit-learn | OpenCV | YOLO

BACKEND / WEB

FastAPI | Flask | Node.js | RESTful APIs

TOOLS & PLATFORMS

Docker | Git / GitHub | Linux | Azure

Certifications

- Claude Code in Action
- Defensive Security and Cyber Risk
- AI Fluency for Students
- Model Context Protocol: Advanced Topics

Honors & Awards

- ★ Edexcel High Achievers Award
- ★ The Daily Star Award

Selected public projects

01 COMPUTER VISION · RESEARCH PROTOTYPE

Traffic Sign Detection ↗

YOLO11 Nano training and a Gradio interface for image, video, and webcam inference.

`Python / PyTorch / OpenCV`

Read case study →

---

02 WORKFLOW DESIGN · INTERFACE PROTOTYPE

Customer relationship management ↗

A set of customer, sales, and support screens for exploring a connected business workflow.

`HTML / CSS / JavaScript`

Read case study →

---

03 OPERATIONS · INTERFACE PROTOTYPE

Manufacturing management ↗

A manufacturing interface exploring products, orders, and dashboard views, with an AI roadmap kept separate.

`HTML / CSS / JavaScript`
